Potential Points of Use - Land Locations

6900. The works used to divert, convey and use the water to the Point(s) of Use authorized by this licence shall include, at a minimum, all of the following as described in the report(s) and plan(s):

(a) the water intake works, pump station(s), fish return system, bank stabilization works, and sedimentation pond(s): DAPP0067640-R002, DAPP0067640-R003, DAPP0067640-P001, DAPP0067640-P002, DAPP0067640-P003, DAPP0067640-P004, DAPP0067640-P005, DAPP0067640-P006, DAPP0067640-P007 as specified in 6890;

(b) distribution pipeline : DAPP0067640-P008, DAPP0067640-P009, DAPP0067640-P010, DAPP0067640-P011, DAPP0067640-P012, DAPP0067640-P013, DAPP0067640-P014, DAPP0067640-P015, DAPP0067640-P016, DAPP0067640-P017, DAPP0067640-P018 as specified in 6890.

6920. The Licensee shall undertake the diversion in accordance with the plans and reports as specified in 6890.

6930. The Licensee shall divert water only for the purpose(s) specified in this licence.
6940. The Licensee shall divert water only from the source(s) of water specified in this licence.
6950. The Licensee shall divert water only from the Point(s) of Diversion.
6960. The Licensee shall divert the water only to the Point(s) of Use.
6970. The Licensee shall not divert more than 4,000,000 cubic metres of water per year.
6980. The Licensee shall not divert water at a rate of diversion greater than 0.381 cubic metres per second.
7030. Prior to diverting any water from the source of water, the Licensee shall equip the Point of Diversion with a meter which measures:
- (a) cumulatively the quantity of all water diverted; and
 - (b) the rate of diversion in cubic metres per second.
7040. The Licensee shall maintain each measuring device referred to in 7030 at all times.
7050. The Licensee shall calibrate each measuring device referred to in 7030 in accordance with manufacturer's specifications.
7060. The Director may amend this licence to establish or change the:
- (a) rate of flow requirement;
 - (b) instream objectives;
 - (c) water conservation objectives;
 - (d) water level requirements;
 - (e) exceedence flows; and
 - (f) cumulative allocations
- upon a minimum of 12 months written notice to the Licensee.
7061. The Licensee shall submit an analysis of ongoing and future diversion volume needs:
- (a) if the project does not proceed in accordance with the manner and schedule described in the plan(s) and report(s) as specified in 6890; or
 - (b) in accordance with a written request by the Director.
7062. The Director reserves the right to amend this licence to reduce the maximum allowable diversion volume if, upon receipt of the analysis required pursuant to condition 7061, the Director is of the opinion that the Licensee has not demonstrated a need for the licensed maximum diversion volume, and a reduced total allowable annual diversion would more appropriately reflect the steady-state requirements for the project.

7063. This licence is based on knowledge available at the time of issue, and therefore the Director reserves the right to amend this licence by:

- (a) reducing the quantity of water diversion;
- (b) changing the maximum rate of water diversion;
- (c) requiring the Licensee to modify monitoring systems and the annual water monitoring information; and
- (d) requiring the Licensee to evaluate off-stream storage or alternative sources of water supply;

if, in the Director's opinion, an adverse effect has occurred, is occurring or may occur due to the diversion of water under this licence on:

- (e) the North Saskatchewan River;
- (f) other water users;
- (g) instream flow needs;
- (h) instream objectives; or
- (i) the aquatic environment.

7064. The Director may amend this licence, pursuant to condition 7063, in consideration of the contribution of this licence to regional cumulative effects, upon a minimum of 12 months written notice to the Licensee.

4. MONITORING AND REPORTING

9200. Unless otherwise authorized in writing by the Director, the Licensee shall measure the total number of cubic metres of water diverted from the source of water on a monthly basis while water is being diverted.

9230. Unless otherwise authorized in writing by the Director, the Licensee shall measure the rate of diversion from the source of water on a daily basis.

9250. The Licensee shall:

- (a) record all of the following information:
 - (i) the place, date and time of all monitoring, measuring and sampling;
 - (ii) the results obtained pursuant to:

(A) 9200

(B) 9230

(iii) the name of the individual who conducted the monitoring, measuring and sampling stipulated in (i); and

(b) retain the information in (a) for a minimum of 5 years after being collected.

9260. The Licensee shall report to the Director the results of the recording in 9250 (a)(ii)(A) using the "Digital Regulatory Assurance System" and any other information required in writing by the Director.

9270. The Licensee shall submit the report required in 9250 (a)(ii)(A) on or before the end of the month following of the month in which the information is based upon was collected.

9300 . The Licensee Holder shall submit a Monitoring Program Proposal to the Director by December 31, 2028.

9310. If the Monitoring Program Proposal is found deficient by the Director, the Licensee shall correct all the deficiencies identified by the Director by the date specified in writing by the Director.

9320. The Licensee shall implement the Monitoring Program Proposal as authorized in writing by the Director.

9330. When requested in writing by the Director, the Licensee shall submit a Monitoring Program Summary Report to the Director by the date specified in writing by the Director.
